

Transforming Environmental Stewardship

REGENERATING ECOSYSTEMS. NURTURING NATURE.

Working Lands Investment Partners, LLC (WLIP) has a long history of pioneering and implementing water and soil remediation, restoration, and regeneration. Our ecosystem restoration work delivers economical, sustainable, and verifiable solutions that alleviate the negative impacts of ecological damage resulting from human activity.

Damaged natural resources can be returned to their former healthy and productive condition. WLIP rehabilitates spoiled ecosystems with integrated science, technology, and environmental management practices. Water and soil are returned to their natural state, contamination removed, disrupted habitats rebuilt, and self-sustaining biological vitality restored.

GETTING CLEAN, GREEN, AND COMPLIANT

WLIP is committed to delivering sustainable, cost-effective ecological outcomes that will fulfill your needs and enhance your reputation with regulators and the public. We provide turnkey results without change orders and have a clear safety track record with no notice of violations. We have strong relationships with regulatory agencies and an unrivaled understanding of environmental policy, practices, and procedures.

CLEAN WATER

We are industry leaders in water remediation and mitigation. Our science, technology, and proven management practices rehabilitate spoiled freshwater sources. We are committed to providing and supporting sustainable restoration of this essential natural resource around the world.

- Pioneers of wetlands mitigation banking, point and non-point contaminate removal and control.

HEALTHY SOILS

Our proprietary soil treatment and management process helps heal and grow agricultural soil. This breakthrough technology and methodology can increase crop yield and nutritional density while building the soil's ability to sequester atmospheric carbon.

- Large-scale land management includes biological carbon sequestration, atmosphere to aquifer services, large-scale soil nutrient management and soil organic matter.

COMPLIANCE

Our work serves to minimize cost, negate risk, and assure compliance. We provide the permitting, remediation, and mitigation services needed to meet the requirements of both regulatory mandates, and your organization's commitments to your communities.
